Hello Leanne,

Attached are the first two sections of the Adolescent Integrated Treatment and Rehabilitation Centre (currently BAC) MOSD. I haven't run them past staff yet, but thought I'd pass them by you to see if this is along the lines of what you are looking for.

I hate to be contentious, but I haven't used the term "Recovery" once. After a lot of thought, I don't know that it is the appropriate term in adolescence. Well not 100% anyway. The fundamental issue is that their development has been arrested. Our aim is to promote development in a number of areas. It may be a subtle difference, but I think that it is consistent with chronic illness in adolescence generally. I can chuck in a couple of "Recovery's" here and there if you wish, but I'd like to retain the focus on development.

I'll work on Section 3 this afternoon.

Kind regards,

Trevor
