NOTES
 1. Although the Greenslopes Youth Residential Rehabilitation Unit (YRRU) is shown against Metro South HHS, it is managed by Children's Health Queensland HHS (contracted to Aftercare).
 2. The headspace Youth Early Psychosis Program (HYEPP) provides early intervention services for young people aged 12-25 years who are experiencing a first episode of psychosis or at very high risk of psychosis.
 3. Young Peoples Early Intervention Team (yPEIT) provides a specialised mental health service to young people aged 15-24 years who reside in the Townsville HHS catchment area. yPEIT has a focus of reducing the duration and impact of psychological disturbance by providing timely recognition and treatment of young people experiencing Early Psychosis, emerging severe and complex non psychotic disorders.
 4. MIND Australia has been contracted to operate two 4-bed YRRUs in Townsville (Labor Government election commitment).
 5. The establishment of the Cairns and Rockhampton AMYS teams was not funded through the Adolescent Mental Health Extended Treatment Initiative (AMHETI). The services were funded under the Keriba Omasker Healing Response following the deaths in December 2014 of eight Torres Strait Islander children in Cairns. Recurrent funding for both services has, however, been provided to Children's Health Queensland HHS.
 6. Child and Youth Forensic Outreach Service (CYFOS) provide services to young people in the Central and Southern Health zones of Queensland. Services include training, specialised assessment, advice, and assistance with intervention planning.
 7. The Commonwealth Government's Access to Allied Psychological Services (ATAPS) provides a maximum of 12 sessions per calendar year upon referral by a General Practitioner. Primary Health Networks act as fundholders.
