Dear Bill

1. I know there is no existing money for capital works in relation to a Tier 3 (or Tier 2 etc) build. However, I recall you mentioned in the 16 August CEO teleconference (I dialed in from a very cold parking lot at Bunnings in Melbourne!) that the Branch was going to apply for up to \$20Million from Q Health/Treasury, and if successful up to \$9Million could be given to fund the build for two Tier 3 sites (2 x 4.5M each) in Townsville and Metro South.

Could you clarify whether this potential funding exists, and if so, when will the window to apply open?

2. If at all possible, I am committed to drawing up a models of care for Tier 2a, Tier 2b, Tier 3 and other services (i.e. Intensive Mobile Youth Outreach Services) that are In scope with IHPA, and will therefore attract Commonwealth growth funding. What is In-scope for 2013/14 from IPHA is easily obtainable, though how we write up a model of care that cannot defined as an out-of-scope child & youth mental health service might be challenging!.

I understand that the Tier 3 model recommended by the ECRG is at odds with the National MHSPF and will struggle to attract attention in the ABF model of funding. However, I've been told that the draft National MHSPF document, which defines what will be In-scope and Out of Scope under the proposed Service Planning Framework, is not publically available. If this is the case, how can we write up a model of services for a draft document that we don't have access to?

Could you please advise.

Cheers

Stephen
